

**Equities Market:**

The equities market begins the month of September on a bearish note as all share index shed 28bps to peck the YTD at 31.74%. The market capitalization also close at 12.309tn. Market breadth invariably closed narrowly in favor of the bears with 24counters as against 21gainers.

Market activities dropped in terms of volume to close at 230million from 265million traded from previous session representing 13.69% decline. However, Value improved by 18.31% to close at 4.77bn from 4.04bn traded from previous session. ACCESS, UBA, ZENITHBANK and STANBIC topped the activities chart in terms of volume while NB, NESTLE, ACCESS, STANBIC and DANGCEM topped the value's chart to contribute majorly to today's market worth.

NSEASI with all other sector indices further closed in the red zone with NSEOILGAS swaying the most with 2.99% as SEPLAT relaxes in price by (5.00%) alongside TOTAL (4.90%). NSEINS on the other hand closed in green with 13bps driven majorly by 5.00% price gain in NEM.

The market has experienced a 5-day consecutive weight shedding from last trading week in the month of august into the month of September and this is not unconnected to Losses in big cap.stocks, majorly industrial sector. The equities market also portrays basically investors' reaction towards continued profit taking. We expect profit taking to halt soonest in order to depict the news around economic recovery as GDP grew by 0.55%(YoY) indicating the emergence of the economy from recession after 5 consecutive quarters of contraction since Q1 2016.
